APPENDIX A

VERSION WITH MARKINGS TO SHOW CHANGES MADE

- [8.] 7. (Amended) The passageway of claim [7]6 wherein said connection structure comprises:
- a pair of frame structures, said frame structures having an upwardly extending ear and a downwardly extending ear;
 - a first pair of angle defining, elongate connection elements for interco-operating with said upwardly extending ear and two ceiling elements of said modules;
 - a second pair of angle defining, elongate connection elements for interco-operating with said downwardly extending ear and two floor elements of said modules;
 - engaging structure for interconnecting said first pair of angle defining elongate connection elements with said pair of frame structures and for interconnecting said second pair of angle defining elongate connection elements with said pair of frame structures.
- [9.] 8. (Amended) The passageway of claim [8]7 wherein said frames are quadrilateral in configuration and wherein each said frame defines a passageway opening therethrough.
- [10.] 9. (Amended) The passageway of claim [8]7 wherein said engaging structure comprises a nut and bolt combination.
- [11.] 10. (Amended) The passageway of claim [8]7 wherein each said frame includes an engagement surface configured to abut against a surface of said module sufficient to permit an adhesive bond between said engagement surface and said module surface.
